wdv-notes 267
Stand: 28.DEZ.1993 (1.)
Wiss.Datenverarbeitung
FREIE UNIVERSITÄT BERLIN

Alle World-Wide-Web-Server des Internets

© 1993–1994 Edited by *Karl-Heinz Dittberner*

Net

Zur Orientierung ist im folgenden ein aktueller Stand *aller* im Internet weltweit registrierten Web-Server wiedergegeben, die nach dem Protokoll des „World Wide Web" (WWW) arbeiten.

Diese Liste ist nur eine Momentaufnahme, da die Anzahl der Web-Server ständig wächst. Es erstaunt wieviel Institutionen – darunter auch der FB Chemie der FUB – in sehr kurzer Zeit diesen modernen, wegweisenden Info-Service einrichten konnten.

Alle WWW-Server werden derzeit bei der CERN in Genf, dem Entwickler dieses besonders benutzerfreundlichen Info-Services, registriert. Die CERN veröffentlicht auf ihrem Web-Server regelmäßig den aktuellen Stand der Server im weltweiten Computer-Netz (siehe Kasten). Informationen zur Funktion und zum Gebrauch von Web-Servern findet man z. B. in den wdv-notes Nr. 252 (Mosaic-Software des NCSA) [1, 2].

1. Liste aller weltweiten WWW-Server:

Die folgende Liste aller World-Wide-Web-Server ist nach Kontinenten und dann alphabetisch nach Ländern sortiert.

Europe

EXUG
The European X User Group.

Austria

SIGGRAPH
ACM SIGGRAPH Bibliography of references on Graphics in computing. Gatewayed from Hyper-G.

Technical University of Vienna, EDV-Lab
Das EDV-Labor der Fakultät für Raumplanung und Architektur der TU Wien.

Technical University of Graz
Information service. Gateway to Hyper-G data.

Belgium

Free University of Brussels
The Principia Cybernetica Project wants to integrate the whole of human knowledge in a simple, universal and easy-to-use framework.

Czech Republic

FZU
Institute of Physics (Division of Elementary Particle Physics), Academy of Sciences, Prague.

Denmark

DAIMI
The Computer Science Department of Aarhus University.

Denmark's Technical Library
The DTB information service includes the library system.

DENet
Information about the resources found on DENet, the Danish Network for Research and Education.

Aalborg University
AUC campus wide information system (under construction in Oct. 1993).

Finland

CSC Finland
CSC (Center for Scientific Computing) is the finnish supercomputer center located in Espoo, Finland. It is the home of the EMBnet brochure (Biocomputing in Europe).

Helsinki Technical University
The service is a WWW server of the Student Union of the Helsinki University of Technology. Currently we use gopher more than WWW, so WWW currently has just links to the gopher tree and services elsewhere.

FUNET information
Finnish University Research Network.

EUnet Finland Oy
EUnet Finland Information Services.

France

CICG
Centre Interuniversitaire de Calcul de Grenoble.

CIRM
Centre International de Rencontres Mathematiques de Marseille.

CNAM
Conservatoire National des Arts et Metiers. This is a purely experimental server in Nov. 1993.

CPPM Marseille
Centre de Physique des Particules de Marseille.

Genethon
Human Genome Centre.

IN2P3
Lyon, France.

INRA
Institut National de Recherche Agronomique.

INRIA
Institut National de Recherche en Informatique et Automatique: technology transfers, development of scientific international exchanges, implementation of scientific expertise...

LORIA

CRIN + INRIA Lorraine

Université de Rennes1
CRI de l'Université de Rennes1.

UREC
L'Unite Reseaux du CNRS est un serveur thematique sur les reseaux informatiques et la securite informatique.

Germany

Berlin University of Technology
Most informations are only of local interest, perhaps with the exception of informations about the strike of the students in Berlin and the weather-forecast.

ComNets
Lehrstuhl für Kommunikationsnetze, RWTH Aachen.

DESY Unix Server
DESY welcome page. DESY laboratories, Hamburg.

ZEUS
ZEUS experiment at DESY, Hamburg, Germany.

HERMES
Hermes experiment at DESY's HERA accelerator.

EUnet Deutschland GmbH
EUnet Germany Networking and Information Services.

Fachbereich Mathematik an der Gesamthochschule Paderborn
Under construction in Nov. 1993.

FU Berlin
Freie Universität Berlin, Fachbereich Chemie (department of chemistry). A lot of information, most in German. Some informations on Berlin and the history of the university are in English.

Institut für Mathematik der Uni Münster
Institut für Numerische und Instrumentelle Mathematik der Westfälischen Wilhelms-Universität Münster.

Institut für Meteorologie der FU Berlin
Freie Universität Berlin, Fachbereich Geowissenschaften. European weather informations, satellite pictures, and a movie demo.

LMU München
Ludwig-Maximilians-Universität München.

Technische Hochschule Darmstadt
University of Darmstadt. It contains information about various institutions of the Uni. Under construction in Nov. 1993.

Universität Bamberg, Wirtschaftsinformatik
Most of the information is only available in German.

In dieser Liste, die den ***Stand vom 24.12.1993*** *wiedergibt, wurden die URLs* [1] *zu den „Home-Pages" der jeweiligen Web-Server nicht notiert, da diese sich zur Zeit bei vielen Servern noch sehr oft ändern.*

Der Zugang zu den Web-Servern erfolgt daher am besten über das Hypertext-Dokument bei der CERN mit der URL:

http://info.cern.ch/hypertext/DataSources/WWW/Geographical.html

University of Freiburg
Albert-Ludwigs-Universität Freiburg
Fakultät für Physik (department of physics).

University of Oldenburg
Physics-Department. Archie Gateway using Forms.

University of Passau
Das Forschungszentrum für wissensbasierte Systeme (FORWISS).

RWTH Aachen
Physics Institutes (experimental in Dec. 1993), and Computer Science Department.

University of Erlangen-Nürnberg
This server provides information about the departments of computer science, special research project, services offered by the institute of computer science, and other stuff.

University of Erlangen-Nürnberg
Regionales Rechenzentrum Erlangen at the Friedrich-Alexander Universität Erlangen-Nürnberg (FAU). Informations about the university (history, chairs, ...), about the city of Erlangen and some maps.

University of Bonn
University of Bonn, CS dep. no. 5 (offers PPP – the Internet Point-to-Point Protocol – faq in html).

ZIB Berlin
The Konrad-Zuse-Zentrum für Informationstechnik Berlin (ZIB), a research institute of the State of Berlin, operates in the field of information technology. R&D on application-oriented algorithmic mathematics.

Ireland

CURIA
Irish Literature archive.

IEunet
Networking Information regarding Ireland, and links to the rest of Europe.

Trinity College Dublin
Department of Mathematics.

IONA Technologies Ltd.
Infos about their Object Request Broker software product and some bits and pieces of Irish news.

The University of Limerick
Information on Natural Language Processing and some research projects in the Department of Computer Science and Information Systems.

Italy

CSP
Centro Supercalcolo Piemonte (Piedmont Supercomputing Center), located in Turin.

ICTP
International Centre for Theoretical Physics (experimental server).

NRC Research Area of Florence
National Research Council: Research area documents about activity and NRC institutes of Florence.

University of Bologna Library Center
It should reach full operative status in a few months, featuring gateways to the Hytelnet database and to the local cataloguing and text retrieval systems (experimental in Nov. 1993).

University of Pisa

Netherlands

CWI
Center for Mathematics and Computer Science, Amsterdam.

Eindhoven University of Technology
Eindhoven Technical University. Specific servers for Math and Comp. Sci, Elec. Eng. Design Automation, Electrical circuits.

NIKHEF
The Dutch High-Energy Physics center.

KVI
Kernfysisch Versneller Instituut (nuclear physics accelerator institute), Groningen, Netherlands. VMS server.

RIPE
European IP group.

TU Delft
Delft University of Technology (experimental).

Norway

Ananse International Trade Law
International Trade Law. We also provide local information on the Law Faculty of the University of Tromsoe. What we intend to do. (under construction in Dec. 1993).

BIBSYS
BIBSYS is a shared library database for Norwegian Universities and other research libraries, and the National Library.

University of Bergen
Institute of Information Technology. Official but experimental server.

University of Tromsoe
The nothernmost university of the world!

Poland

Warsaw University Physics Department
Under construction in Oct. 1993.

Portugal

University of Minho
Campus-Wide Information System.

Slovakia

UAKOM
Note .cs to change to .sk sometime.

EUnet Slovakia
EUnet Slovakia Information Services.

Slovenia

J. Stefan Institute
IJS is located in Ljubljana. This server contains info about the J. Stefan Institute, about Slovenia, links to other info in SI.

Spain

UNICAN
University of Cantabria, Department of Modern Physics. Information about High Energy Physics, Astrophysics, Theoretical Physics, Nuclear Physics, DELPHI experiment... (experimental in Dec. 1993).

University of Jaume I
The Department of Education of the Universitat Jaume I (Castello, Spain). (Experimental in Sep. 1993).

Sweden

Chalmers University of Technology
Pointers to other servers at Chalmers and to the Round Table project, most information is in swedish.

Linköping University's Lysator
Science fiction archives, MUDs, etc etc.

SUNet
Swedish Universities Network information center. Provisional, some pointers to Swedish stuff.

Lulea University
LUDD (Lulea Academic Computer Society) has an automatic FAQ-hierarchy , and an archie interface to the local archie.luth.se service. (Experimental).

KTH
The Royal Institute of Technology in Stockholm.

University of Lund
Lund University Electronic Library.

Switzerland

CERN

CERN news
Various groups, some more active than others.

CERN computing documents
A keyword index.

ASIS Software Repository
A server for public domain and CERN software for distribution to CERN members only. The documentation is public.

CA Detector Design
Computer Aided Detector Design support.

CERN general information
WWW support for within CERN and info about CERN, and WWW fledglings.

The DELPHI Experiment
DELPHI (DEtector with Lepton, Photon and Hadron Identification) is one of the 4 big LEP experiments.

RD13 documentation
Documents for the RD13 group.

Hytelnet gateway
Server for Peter Scott's "hytelnet" database of telnet sites.

SCI project
Scalable Coherent Interconnect development. Under construction in Jun. 1993.

TechInfo gateway
Several CWISs available through this.

Alle World-Wide-Web-Server des Internets

© 1993–1994 Edited by *Karl-Heinz Dittberner*

Software Technology
Information from STING organised by Mike Sendall.

VXCRNA help
The VMS help tree on Internet node vxcrna.cern.ch.

WorldWideWeb support
Information about WWW itself, CERN entry point, and web overviews.

University of Geneva

University of Geneva TECFA
Technologies de Formation et Apprentissage.

University of Geneva CUI
Centre Universitaire d'Informatique.

University of Geneva ExPASy
The ExPASy molecular biology server.

EPFL Lausanne LIT
Laboratoire d'Informatique Technique. Their various research projects are concerned with CNS, FIP, object-oriented design...

EUnet
Official WWW server for EUnet Switzerland.

European Molecular Biology Network Information
Is the entry point to a commonwealth of information on EMBnet, the European Molecular Biology Network, its services and projects, its history and members.

University Zürich Institut für Informatik
Experimental in Dec. 1993.

United Kingdom

Brunel University
Brunel has set up two WWW servers: the official Computer Center, Brunel Library and Information Service (BLIS) server, and the Student server.

City University
City University, London (June 1993).

Cranfield
Cranfield Institute of Technology, Bedford, UK. Campus-Wide information.

Durham
The HEPDATA High-Energy Physics database of published numerical results. Mike Whalley.

Imperial College Department of Computing
It will cover both Department of Computing, Imperial College, services and the src.doc.ic.ac.uk archive services.

Leeds University
Computer-based learning unit, School of chemistry, University Computing service, Central Administration.

Loughborgh University
High Performance Networks and Distributed Systems archive.

Nexor
Includes full hypertext archie gateways.

PIPEX
The Public IP Exchange.

Rutherford Lab
The Rutherford Appleton Lab, UK. Admin: www-master@letterbox.rl.ac.uk.

SuperJANET
An information source of the UK SuperJANET project (under construction in Oct. 1993).

UK Office of Library Networking
Server "experimental" as of April 1993.

Nottingham University
Information on the Communications Research Group, archie gateway, and UK independent music scene information base.

Warwick University
University of Warwick, with links to other WWW sites in the UK.

University of Sunderland
Experimental in Dec. 1993.

University of Southampton
Southampton University Astronomy Group.

University of Cambridge Astronomy
Institute of Astronomy and Royal Greenwich Observatory.

University of Cambridge Computer Laboratory
The official WWW server of the Computer Laboratory. We have the first coffee machine on the web so you can see how full it is and hence whether it is worth visiting it.

Cardiff
University of Wales College of Cardiff, Department of Computing Maths (experimental in Sep. 1993).

Edinburgh University Computing Services
Providing a hypertext of helpful information for new users of the UNIX operating system (experimental in Sep. 1993).

University of Sheffield Department of Chemistry
Its features include Web-Elements (periodic table database, interactive isotope pattern calculator, and interactive element percentage calculator) as well as cricket information.

University of Manchester
Manchester Computing Centre. Will shortly be used for the Central NRS (Name Registration Scheme) database.

University of Manchester
Computer Graphics Unit. Computer Graphics services, software, research, images, general information. This server is officially mandated and representative.

University of Newcastle
Theory of Condensed Matter Group , Dept. of Physics, University of Newcastle upon Tyne UK.

North America

Canada – British Columbia

University British Columbia
Computer Science. Includes manual page browser and the UseNet article decoder.

University of Northern British Columbia
University of Northern British Columbia in Prince George, British Columbia, Canada (under construction).

Canada – Alberta

Center for Subatomic Research
University of Alberta,
Department of Physics Edmonton, Alberta (experimental in Oct. 1993).

Canada – Ontario

Carleton University – Biology department
This server is dedicated to Biology/Ecology, to provide access to a peer-reviewed journal in conservation biology (Under construction in Oct. 1993).

Carleton University
Provided by the Civil Engineering Department (experimental in Oct. 1993).

Canada – Quebec

Universite Laval, Genie Electrique
Centre d'Optique, Photonique et Laser – Grands Reseaux d'energie – Electrotechnique, Electronique de Puissance et Commande Industrielle – Radiocommunication et Traitement du Signal – Vision et Systemes Numeriques.

USA – Arizona

CCIT Arizona
University of Arizona information.

NOAO
National Optical Astronomy Observatories (experimental in Sep. 1993).

USA – California

BSDI
Berkeley Software Design Incorporated.

Berkeley Museum of Paleontology
We have a fairly large and still growing exhibit entitles "History of Life" and a smaller exhibit of the Palaeontological Institute of Russia.

Caltech high energy theoretical physics group
Under construction in Oct. 1993.

Caltech undergraduate computer science laboratory
Caltech information and links to other resources at Caltech. This server is *not* officially mandated by or representative of Caltech.

Center for EUV Astrophysics
Extreme Ultraviolet Explorer satellite data and status information.

Digital Equipment Corporation
Product information — technical overviews, performance summa-

ries, software product descriptions (SPDs), whitepapers, the Networks Buyers Guide, the Systems and Options Catalog (SOC) and back issues of the Digital Technical Journal. Digital Corporate Research also provides research reports, and extensive archives of public domain software and documentation from both the Internet community and Digital Equipment Corporation.

The Global Network Navigator
GNN is dedicated to helping you explore the information resources of the global network. In GNN, you'll find news, reviews, feature articles, advice, commentary and interactive navigational guides.

Global Village Communication
Located in Mountain View, California, USA. We develop communications products for Macintosh.

The InterNIC
General Information about the Internet.

Lawrence Berkeley Laboratory
LBL has information on 1) LBL research for the lay public, 2) Information on the Conference on CHEP 1994, 3) The Comprehensive Epidemiologic Data Project, 4) LBL's Particle Data group, 5) the ACM SIGMOD Online Services, 6) and coming soon, data and research from LBL's Human Genome Project.

Mother Jones
Mother Jones is a U.S. magazine publishing exposes and progressive political commentary, and we've got a new server with all of 1993, full text and covers (more images soon).

O'Reilly Associates
Publisher of online and off-line material.

SLAC
Stanford Linear Accelerator, California. HEP preprints database and LOTS more... Also an Unix server.

Stanford Don Geddis' Personal server
Text: Humor. Hypertext: Aiki Jujitsu. Code: DTP theorem prover.

UCLA: InfoUCLA
The University of California at Los Angeles' official information service.

UCLA Underground
A competitive information service run by the Computer Aided Design Lab. (They also run a biorhythm server).

Xerox PARC
Palo Alto Research Center.

Xerox PARC Web2 Server
Home of the Digital Tradition. A data base containing the words and music to thousands of folk songs.

USA – Colorado

The Astrophysics Data System
ADS is a NASA-sponsored program which offers a novel approach to dealing with huge quantities of geographically distributed and heterogeneous data from a broad range of astrophysics missions.

Ellery Systems, Inc.
Contains information both about our company and our distributed computing projects.

NCAR
The National Center for Atmospheric Research (NCAR), is an NSF-funded supercomputing center and a member of the National Conortia for High Performance Computing.

University of Colorado at Boulder
You can (soon) find out a lot of what's going on at the University of Colorado at Boulder and the surrounding community.

XOR Network Engineering
A company that provides a full range of network engineering and system support services.

USA – Connecticut

Trinity College
There are many things on this server, most notable of which is the Trincoll Journal – a multimedia magazine.

University of Connecticut Health Center
Center for Neuroscience, Farmington, Connecticut, USA.

Yale University
Primarily the departments of Computer Science, Math, Psychology, the "Zoo" (an undergraduate computing lab), Parallel Supercomputing, and Applied and Theoretical Neurosciences.

USA – District of Columbia

US Naval Research Lab
Connection Machine Facility US Naval Research Lab.

USA – Georgia

Computone Corporation
Manufacturer of data communications hardware and software. Current product data sheets, software release notes, and update drivers are on-line.

USA – Hawaii

Honolulu
Honolulu Community College.

USA – Illinois

FNAL Astro
Astrophysics support at FNAL. (Includes TCL help files BTW).

Fermilab
Documentation from online and off-line groups. Also at FNAL, experimental servers in FnalA Theory, D0 , ACCESS user consultancy.

HEP Network Resource Center
Based at Fermilab. Runs the High Energy Physics Information Center (HEPIC).

NCSA
National Center for Supercomputing Applications, Urbana Champaign, IL, USA.

The Northwestern University – Dept. of Mathematics
This server contains information about the department and items of interest to its faculty and students.

NWU
Northwestern University, Network Response Center.

CERL
The US Army Construction Engineering Research Laboratories. They use GRASS (Geographic Resources Analysis Support System).

Argonne National Lab
The Argonne National Laboratory, Advanced Photon Source, Controls and Computing Group Information Server. They use EPICS (Experimental Physics and Industrial Control System).

USA – Indiana

University of Indiana
Computer Science Department (experimental in Mar. 1993).

IU Law School
Indiana University School of Law. In an experimental stage.

USA – Kansas

University of Kansas
Campus-wide system in hypertext.

TISL
The University of Kansas Telecommunications and Information Sciences Laboratory (works on high speed networks, digital signal processing, simulation of communications systems and networks).

Kansas State University
Dept. of Computing and Information Sciences.

USA – Louisiana

LSU
Louisiana State University Office of Computing Services. (under construction in Oct. 1993).

Louisiana Tech
CWIS and pointers.

USA – Maine

The Jackson Laboratory
Mammalian Genetics – Research, Resources, and Training. This server has information of interest to the biological community.

USA – Maryland

The Agricultural Genome
At the National Agricultural Library which is part of the U.S. Department of Agriculture.

NLM
The National Library of Medicine is the world's largest library dealing with a single scientific/professional topic. It cares for over 4.5 million holdings (including books, journal, reports, manuscripts and audio-visual items).

RML at NIH
Rob's Multimedia Laboratory at National Institutes of Health (experimental).

STELAR
The STELAR project, part of NASA's Astrophysics Data Facility. Astronomical information and bibliographic databases at NASA's Goddard Space Flight Center.

Space Telescope Science Institute
Space Telescope Electronic Information System

Alle World-Wide-Web-Server des Internets

© 1993–1994 Edited by *Karl-Heinz Dittberner*

University of Maryland at College Park Department of Computer Science has set up two servers, one run by a faculty member (and not using HTTP), the other run by graduate students. Both are under construction in Nov. 1993.

USA – Massachusetts

Harvard University Physics Department
It has mostly items of local interest, but there are pointers to a few documents which may be useful to a wider community.

MIT SIPB
Student Information processing Board, gatewaying AFS, the Discuss bulletin board system, the Geographic Nameserver, US National Weather information, Amateur Radio Callsign database.

MIT AI Lab
MIT Artificial Intelligence Laboratory.

MIT-LNS
MIT Laboratory for Nuclear Science.

The Tech
MIT's oldest and largest newspaper.

UU-NNA
"UseNet University — New Network Academy" . A virtual university project. Host may change.

NCHPC
National Consortium for High Performance Computing. The server is operating experimentally.

Boston University
Includes information on scientific computing and the computational science groups at B.U.

University of Massachusetts
At Amherst, Astronomy Astronomical research project information, Graduate Program Brochure, and departmental directories.

USA – Michigan

Classics and Mediterranean Archaeology
Department of Classical Studies, University of Michigan.

Michigan State University
Experimental.

Oakland University
Oakland University Information, and access to Oak Archive (primary SimTel mirror).

University of Michigan
School of Information and Library Studies. Listings of current SILS and ILS-related information services.

USA – Minnesota

AHPCRC
Army High Performance Computing Research Center, university led research and educational consortium.

University of Minnesota
The Geometry Center is pleased to announce that it is now running a Web server. The server contains, among other things, the illustration from the October 1993, Scientific American cover.

St. Olaf College
Experimental.

USA – Mississippi

MSU
Mississippi State University information.

USA – Missouri

Data Research
Variety of reference and research information. Several experimental databases are available including the Library of Congress bibliographic and authority databases. Other databases are available only by subscription.

The Maize Genome Database project
Operated by the USDA MAize Genome Database. Project located at the University of Missouri — Columbia, and provides access to Maize-related information (experimental in Dec. 1993).

USA – Nevada

University of Nevada, Las Vegas
Information about the University and the various departments, and a listing for local events.

USA – New Jersey

Rutgers University INFO
The Rutgers Campus-Wide Information System. Information about departments, services, and events from throughout the University.

Princeton
Astrophysics: Sloan Digital Sky Survey.

USA – New Mexico

Los Alamos
Physics Information Service.

LANL
Los Alamos National Laboratory. See also the CNLS (Centre for Nonlinear Studies).

USA – New York

AskERIC
AskERIC is geared towards providing information on the process of education to the k-12 community and those interested in education. (under construction in Dec. 1993).

Brookhaven National Laboratory
Multi-disciplinary laboratory that carries out basic and applied research in the physical, biomedical and environmental sciences and in selected energy technologies.

Cornell Law School
Ithaca, New York, USA. Contains legal information (US Intellectual Property Statutes etc etc.).

Cornell Theory Center
Includes links to extensive online information system about supercomputing architectures there.

Cornell Wilson Lab
Serving information about the high-energy physics program at Wilson Lab, CLEO collaboration preprints, and related information.

State University of New York
Stony Brook. See their Physics Department.

SUNY/Buffalo Geography Department
You-Are-Here server (which takes your hostname (or any other) and tries to display it on the map), and information and research exhibits from the NSF-funded National Center for Geographic Information and Analysis. (under construction in Nov. 1993).

USA – North Carolina

CNIDR
The Clearinghouse for Networked Information Discovery and Retrieval at North Carolina's MCNC.

UNC Chapel Hill
Includes US Politics, Sun Freeware, Multimedia. You should have a look at the EXPO, including 4 multimedia exhibits: Vatican, Soviet Archive, 1492, Dead Sea Scrolls.

UNC Institute for Transportation Research and Education
The subjects covered by this server include transportation, highways, education, geographic information systems, ARC/INFO, satellite television, Raleigh, and North Carolina.

Wake Forest University
Contains Deacons On-Line – the campus-wide information system – , research documents available to the public; on-line user's guide – , the guide to the university's academic computing system, a Unix system.

USA – Ohio

Morning Star Technologies
Morning Star Technologies makes products for low-cost IP connectivity: SLIP, PPP, Frame Relay, X.25. This WWW and FTP server represents, and is officially supported by the company.

Ohio State University
Lots of indexed hypertext: unix man pages (indexed), RFCs, gateways into various things.

USA – Pennsylvania

University of Pennsylvania
Experimental as yet.

CMU
Carnegie Mellon School of Computer Science.

The English Server
We offer many texts not available elsewhere on the Internet, primarily of interest to humanities scholars.

Pittsburgh Supercomputing Center
PSC's mission is to provide advanced scientific computing.

USA – Rhode Island

Brown University HEP
The Brown High Energy Physics Group.
Brown University Physics
Brown University Dept. of Physics (under construction in Oct. 1993).

USA – Texas

SSC
Superconducting Supercollider Laboratory.
IBT
W. M. Keck Center for Genome Informatics, Institute of Biosciences and Technology, Texas A&M University, Houston.
University of Texas-Houston
Health Science Center Campus Wide Information.

USA – Utah

Brigham Young University CS Department
General information about the CS department including faculty, course listings, facilities listing, an online floorplan of the CS building, announcements, and links to the research laboratory.
Brigham Young University Laboratory for Applied Logic
Provides access to our LAL tech library, and online documentation to the HOL proof assistant, support for courses (soon), with exercises, errata to the textbook, and FAQs online.
Dixie College Center of Excellence
St. George, Utah, USA.

USA – Vermont

University of Vermont EMBA
University of Vermont Engineering, Maths and Business Administration.
Unix. Vermont Library
Journals available through the Scholarly Communications Project.

USA – Virginia

Virginia Tech
Virginia Polytechnic Institute and State University. Experimental.
NASA LaRC
Primarily in aeronautics, but there is some space, computing, and life sciences.
USGS
US Geological Survey: a scientific fact-finding and research organization, and the principal source of scientific and technical expertise in the earth sciences within the Federal Government.

USA – Washington

University of Washington: Physics HyperTexts
Charm Studies, Underwater Astrophysics, and more.
University of Washington High Energy Physics Lab
Home page for the High Energy Physics Lab.
University of Washington Nuclear Physics Laboratory
Among other things, this gives access to a hypertext version of the 1993 Annual Report of the UW Nuclear Physics Laboratory.

Middle East

Israel

Hebrew University of Jerusalem
Information service – both in hebrew and English, assumes a VT terminal with hebrew characters. See also their TeX database (July 1992).

Pacific Rim

Australia

Australian National Botanic Gardens
Biodiversity, australian plants (Catalogue).
ANU Bioinformatics
Research School of Biological Sciences & Centre for Information Science Research at the Australian National University. Bio-Informatics department.
ERIN
The Australian Environmental Resources Information Network.
Monash VIFP
Victorian Institute of Forensic Pathology.
Mt. Stromlow Observatory
Mount Stromlow and Siding Spring Observatory.
The National Library of Australia
University of Sydney
Basser Department of Computer Science (information about the department and its current research). The Written Web (Communication rather than purely information technology).

Japan

KEK
KEK, Tsukuba, Japan. Experimental only.
NTT
Nippon Telegraph and Telephone Corporation, Tokyo. Serving Japanese Information corner of the web, etc.
Chiba University
Ikeda Lab., Chiba University, Chiba, Japan. Serving Graphical Symbols standardized in IEC Publication 417, colour paintings with background music, etc.
Hokkaido University
Hokkaido University, Sapporo, Japan. Serving Information about Hokkaido (in Japanese) and Information about Sapporo city (in English).
IIJ
Internet Initiative Japan Inc., Tokyo, Japan.
KEIO University
Keio University, Science and Technology Campus WWW. This server is operated by Computing Center, a division of Faculty of Science and Technology, and has pointers to other WWW servers in our campus.
NCC
National Cancer Center, Tokyo, Japan. Serving Informations, including University of Tokyo.
Tokyo University
WWW server for the Yonezawa Lab. at the Department of Information Science, University of Tokyo.

New Zealand

University of Waikato
The University Of Waikato – Te Whare Wananga O Waikato.
Victoria University of Wellington
Campus-wide system. etc.
VUW Phone book
Students and Staff.

Singapore

National University of Singapore (NUS)
BioWWW server. Information available from the National University of Singapore, Singapore Technology Network TECHNET, and the Biocomputing Interest Group BIG.
TECHNET
Singapore Technology Network. Singapore's Island Wide Research and Development Network is set up by National Science and Technology Board of Singapore (NSTB) and managed by National University of Singapore (NUS).
Singapore National Computer Board (NCB)

Taiwan

The Tung Nan Junior College of Technology
Under construction in Nov. 1993.

Thailand

NECTEC
The National Electronics and Computer Technology Center. General information about Thailand.

Restricted or difficult to access

Xerox PARC
Private: Access from Xerox.Com only. System33 document server.
CIS Informationsdienst
The information service from the Centrum für Informations und Sprachverarbeitung von München (don't panic: they also have it in English!). Experimental, very slow line, times out.
VOICE magazine
The first global online hypertext magazine? Ed. Tom Boutell Gone? Was http://isis.cshl.org.:80/main.html.

2. Sonstige Hinweise:

■ HTML ist das Format, in dem die HyperText-Dokumente mit den URL-Pfaden [1] gespeichert werden.
